Common core (6 features, in every representation)
event_count, promotion_count, sanction_count,
salary_increment_count,
performance_review_count,
min_salary_increment_interval_days
Raw additions (3)
min_promotion_interval_months
commendation_count
months_since_hire
Policy-aware additions (3), from
assess_promotion_history() under the
scenario policy and policy epochs
policy_service_deficit_months
policy_service_deficit_ratio
policy_unexplained_short_promotion
raw_matched (9 features)
policy_matched (9 features)
Raw ablations (columns removed)
raw_without_commendation (8): core
+ min_promotion_interval_months
+ months_since_hire
raw_interval_ablation (7): core
+ min_promotion_interval_months
Policy ablations (one policy feature kept)
policy_deficit_months_ablation (7): core
+ policy_service_deficit_months
policy_deficit_ratio_ablation (7): core
+ policy_service_deficit_ratio
policy_unexplained_ablation (7): core
+ policy_unexplained_short_promotion
Falsification controls: same 9 columns as policy_matched, altered policy input
wrong_policy_control
policy additions computed under the next
stock policy profile, without policy
epochs or grandfathering evidence
shuffled_policy_control
each history takes the 3 policy additions
of another history (seeded rotation;
value frequencies preserved)
